found PBM money for the
Client

Up to \$2.50 per claim

Our examinations save our
clients from \$1.15 to \$2.50 on
average for EVERY claim we
review

Real – Time Examinations mean that
you never overpay for your Pharmacy
Benefits.

Real – Time Examinations give your
members fast adjustments on their
deductibles.

Real – Time Examinations lower your
total Benefit Costs to members.

Self Funded Business, Federal, state, local governmental agencies, TPAs and other groups that provide pharmacy benefits to their employees or members have continuously struggled to provide the highest quality benefits at the lowest cost to their members, taxpayers or stock holders. Pharmacy benefit contracts are complicated documents that make it difficult or impossible for the benefit administrator to verify the charge billed to the actual agreement. PBM Analyzers has created a real time service, that examines every claim to the contractual terms enabling the administrator to pay the correct amount, called Real – Time Contract Compliance Examination.

Pharmacy benefits are often billed to the administrator on a bi-weekly basis and automatically deducted from their bank accounts within 10 days. This short time frame does not allow the typical administrator sufficient time to review every claim efficiently.

This new Real-Time Examination service started on November 1, 2008. The service accepts the detail from the PBM, examines every claim to the contractual terms and renders an adjusted detailed report in under 48 hours. With accurate information, benefit administrators can have the confidence of knowing that they are paying the correct amount for services rendered.

PBM Analyzers' is the first to offer a real time pharmacy contract compliance service to customers with 250 to 5000 employees. PBM Analyzers is a leading provider of historical claim by claim contractual examinations, reviewing up to 84 months of historical data on behalf of clients, resulting in the return of hundreds of thousands of dollars of out of compliance. Historical examinations on average yield 2 to 5 percent error rates in which up to 1/3 of the total claims summary violates the PBM Contract.
